

AMENDMENTS TO THE SPECIFICATION

Please replace the full paragraph on page 1, beginning line 14, with the following paragraph:

However, with the advent of 802.11 radio, it is possible to have in a single device, such as computer, an 802.11 adapter card and a 1394 card that permits control of devices, for example, such as a camera, camcorder, monitor, etc. Another computer can communicate with the first computer, and if it is desired, for example, the images captured by the camera can be sent to the second computer. In order to send the images to the second computer, the camera will transfer image data along the 1394 wired bus to the first computer. With the advent of wireless communication, particularly Wireless Local Area Network (WLAN) ~~WLAN~~ such as 802.11a or 802.11b (hereinafter "802.11a/b") increases the possibility for this particular method of communication to be used for communication between the first and second computers.
